In March this year we lost a considerable number of our White Suffolk ram lambs to Lupinosis. We lost some Poll Merino ram lambs as well but not nearly as many. The badly affected lambs all died and the others that survived and had liver damage have all been precluded from the sale team. As I regularly body weigh I have been able to identify those that lost weight or didn't achieved the weight gains compared to the average. These have not been included in the sale team despite some having reached satisfactory weights. I have consulted and worked with the experienced animal health advisor, Brian Ashton. I believe that the rams in the sale are sound and you can have every confidence in them in their ability to perform. **I WILL GUARANTEE MY RAMS.**

In order to offer sufficient rams for sale I purchased 18 ram lambs from Peter Button's Ramsay Park Stud at Minlaton, 12 of which make up the last 4 pens.

GREY SHADED FIGURES = Trait Leaders (Rams in top 10% in Sheep Genetics Australia)
