YANTA WHITE SUFFOLKS

The sires of this years sale rams are lead by Farrer 188, a sire that has been used by 28 other studs in Australia. His offspring are very appealing as are those from another AI sire Ashmore 120 used in 11 studs. I have left a Farrer 188 son for my own use and I recommend his inspection. The two Pollambi 451 sires continue to breed well. Nearly all sires have well above average Eye Muscle Depth (PEMD) and great meat eating qualities. I have also kept Birth Weight ASBV down with all sires below the 50% percentile band.

YANTA POLL MERINOS

Poor AI results meant not as many lambs were weaned as I would have liked. That aside I still had good numbers to select from helped by good natural mate results. Both Leahcim sires bought in 2015 have bred well along with a Yanta bred Wallaloo Park Casper son 247, whose offspring have high CFWs. I remain steadfast in my pursuit of producing white well nourished wool and this line up of sale rams I believe achieve that. As the rams would have less than 4months wool for microning I have used the micron measurements taken at the PW stage with 6 months wool.
