YANTA WHITE SUFFOLKS

I believe we have gone to a higher genetic level with the 2017 lamb drop. We have a blend of AI offspring from some leading sires in Australia, some proven sires we have used again for natural mating and two rams we bought at the elite ram sale in Adelaide in 2016. Two rams that are breeding very well are from Bundarra Downs 109192 (AI), one being the top priced ram at the 2015 ram sale that I was able to borrow his twin brother the other, I kept for our use. Last year (2017) I bought a ram from Ashmores reserves for \$10,000 and used semen from Ashmore 130269 that breeds outstanding meat eating quality as well a great figure for handling worms. Both rams have a good number of lambs on the ground. The rams are a little lighter this year due to a difficult season.

YANTA POLL MERINOS

Once again we had poor AI results meaning that not many lambs came from Collinsville 242 or Poll Boonoke 026. Fortunately we have had a better AI result this year. The rams have a poorer feed year to grow and I see from my records that body weights have been lower than previous years. However they have grown a lot over the last 2 months and look well. We have 6 months wool growth on them which in nearly 2 months more than other years.

I look forward to seeing you on the day
